

Year 2 Home Learning

Topic & Science

Our topic this half term is *Transport and Travel*. We will learn about different modes of transport, why and how we travel, and where we might travel to.

In science, we are looking at *Living Things and their Habitats*.

Proper Project

Continents and Countries

We will be learning about the continents this half term.

Research the different continents.

What similarities and differences do you notice? You could choose one, or many of the continents to research.

Make a fact file about your chosen continents. You could make a fact sheet, a book or PowerPoint presentation —it's up to you!

Create 'n Make

Create a habitat for your favourite living creature. You could forage for real items or make your own.

Think about what your creature will need to survive and to be comfortable. Think about what continent your creature would best be suited to living on. Would it prefer colder areas or warmer ones; drier conditions or wetter?

Espanol

We are learning days and months in Spanish. Look through a calendar and see if you can remember the names of the months. You could write the months in Spanish and then play matching games with the English.

Let's talk...

Many vehicle manufacturers are investigating alternative fuels to power cars, buses and lorries. Why do you think this is? What might the vehicles of the future be powered by?

Out and about...

You could visit the woods or the parkland walk. Have a look under fallen branches and leaves to see what is living there. Or... keep any tickets you have used for a journey on transport. Bring them in to show the class!
