Animals

This term, our topic is *Animals*. We will learn about different types of animals including farm animals, mini-beasts, underwater animals and animals from different places around the world. We will also be finding out about ways to classify animals according to their different features.

Create 'n Make

It is so easy to make playdough!
Here is the recipe:

*Two cups of flour, one cup of salt, one spoon of oil, one cup of water bit by bit. Our secret ingredient is to add a little spoon of cream of tartar.

Make it fun with food colouring and glitter.

Once your playdough is ready, have a go at making some animal models and create your own animal park.

Physical Development

Do you know why it is important that we keep ourselves clean? Do you remember to flush and wash your hands after you've been to the toilet? Practise this every time you go!

What is your morning routine?
Can you wash your face and brush your teeth by yourself?

Out and about...

Have a walk around your local area. Look in a garden, visit a local park or woods. Draw or write a list of any animals that you see or signs that animals have been there, e.g. footprints. You could even take a photo of what you see. Where do these animals live? What do they eat?

Let's talk...

Should animals be kept in zoos? Think about the good and bad things about zoos. Would the world be better or worse without zoos? Talk to your family about this. What do they think? Do you agree with them? You could also read the book 'Zoo' by Anthony Browne.
