

Nursery Home Learning

Create

The children have been really interested in food and recipes. Some of the children have already thought about and made dishes in the Nursery such as pizzas and buns. Have a think of something that you would like to make. Think of the ingredients and what you might need to do to make it. Have a go at drawing the shape of the food and writing down your recipe (adult can scribe for them). If you want you could take your recipe to the shops to buy the ingredients and then make your chosen food.

1 2 3 4 5 6 7 8 9 10

We've been practising counting to 10 in the Nursery and counting different objects. We've also been practising our jumping and hopping skills. Ask somebody to choose a number between 1-10, or you could roll a dice, now try to jump or hop this amount. For example if you pick 5, you must do 5 jumps. Try to count as you jump. You could also try counting claps, or you could count the number of steps it takes to climb some stairs. Ask a friend or family member to jump, hop or clap and see if you can count how many they do.

Let's talk...

Over the past few months we have read lots of stories to the children. What's your favourite story? Ask an adult or family member to read a story with you and talk to them about your favourite part and what happens at the end. Who is your favourite character and why? Ask an adult what their favourite story was when they were a child and why they liked it.

Physical Development

Lots of children are beginning to write letters that they are familiar with. Have a go at writing the first letter of your name or your whole name in a number of ways. You can try painting it, writing it using chalk outside, with your finger in sand. You could try writing it in big letters or small letters. You could even try making your name out of collage materials by writing your letter/letters and sticking materials over the top.
