

Year 2 Home Learning

Topic & Science

Our topic this half term is 'Hooray! Let's go on holiday'. We will be looking at holidays in the past, traditional seaside holidays, as well as holidays now and imagining what holidays may be like in the future. In Science, we will be learning about plants, building on our learning from Year 1.

Proper Project

Design a hotel!

Choose a geographical location or holiday destination and design a new and unusual hotel.

You could look at some existing hotels for inspiration: ice hotel, treetop hotels, Giraffe Manor. Think about the weather there, what people might like to do there, and how you want the hotel to look. Also consider a theme, what will the staff wear? What will the rooms look like?

Create 'n Make

Plant some seeds and make a diary of the changes that you observe.

You could choose two different seeds and compare how the two seedlings grow. Does one grow faster or need more water?

Espanol

In Spanish we have been learning about clothes. Can you remember all of the words you learned? Imagine packing your suitcase for a holiday, what clothes will you need?

Let's talk...

Many people travel far and wide for their holidays. This has led to an increase in air travel which is bad for the environment. Do you think we should limit travel in cars, planes and trains? What might happen if we did?

Out and about...

The Museum of Childhood in Bethnal Green has a seaside exhibition with Punch and Judy and a sand pit. You could also visit a beach in the UK—if the weather allows!
