

HOW IGNEOUS ROCKS FORM

BY ALEXIS AND BETH

IGNEOUS

BY BETH

FIRST THE IGNEOUS ROCK IS MAGMA JUST WAITING TO GET OUT OF THE EARTH'S CRUST. IT'S PUSHING AND PUSHING AND..... POW!!!

IT BURSTS THROUGH THE TOP AND RUNS DOWN THE VOLCANO'S SIDES.

THEN IT COOLS DOWN INTO ROCK. THAT'S CALLED BASALT... BUT OH NO! SOME OF THE MAGMA'S LEFT INSIDE. IT COOLS DOWN IN THERE. THAT'S CALLED GRANITE. IT IS AN IGNEOUS ROCK.

UP NEXT: ALEXIS'S IGNEOUS COMIC PART

IGNEOUS

BY ALEXIS

FIRST, MAGMA FORMS A POOL AND STARTS TO PUSH UP. IT WILL SOON BECOME A VOLCANO.

WHEN IT FORMS A VOLCANO, IT ERUPTS A BIT LATER. SOME MAGMA COMES OUT BUT SOME STAYS IN...

THE MAGMA THAT RUNS DOWN THE VOLCANO TURNS INTO BASALT. THE MAGMA THAT STAYS IN TURNS INTO GRANITE.
