

HOW ROCKS FORM IGNEOUS

IGNEOUS

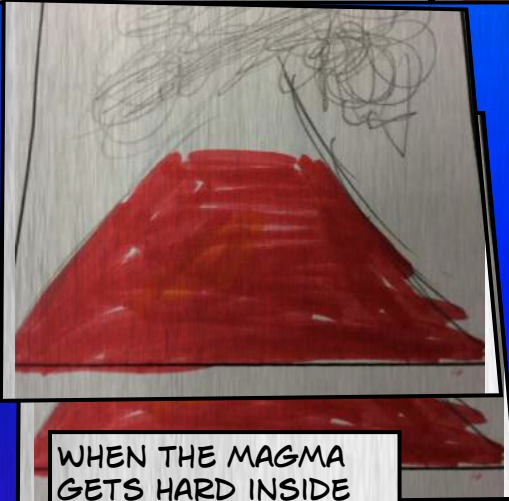

BY OTTO AND ALIBI

WHEN THE ROCK IS
LIQUID AND INSIDE
THE EARTH IT IS
CALLED MAGMA.

THEN VOLCANOES
ERUPT AND THE
ADAPT AND THE
LIQUID ROCK
COMES UP
TO THE EARTH'S
SURFACE THEN
NEW IGNEOUS
ROCK IS MADE.

WHEN THE MAGMA
GETS HARD INSIDE
THE CRUST IT TURNS
INTO GRANITE, IT
COOL VERY SLOWLY
AND IT IS VERY
HARD.
