

# How rocks are formed

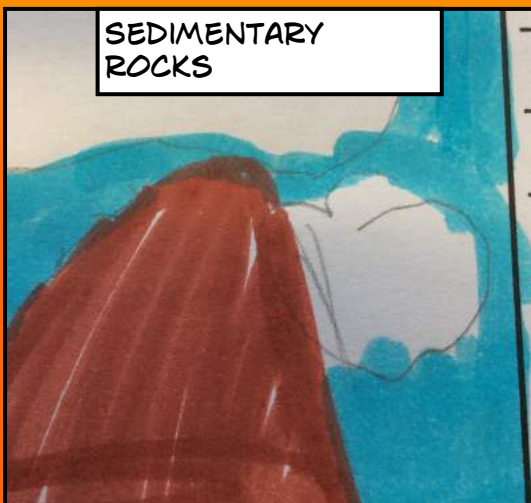

FIRST THE LIQUID  
HOT MAGMA SETS  
UNDER THE GROUND  
JUST WAITING TO  
GET OUT AND---  
POW!!!!!!!!!!!!

ALL OF THE MAGMA  
BURSTS OUT IN TO A  
VOLCANO.

AFTER A VERY LONG  
TIME SOME OF THE  
MAGMA IS STILL IN  
THE VOLCANO, IT  
TURNS INTO GRANITE.

SEDIMENTARY  
ROCKS

MOUNTAINS ARE  
MADE OF ROCKS.

WEATHER CAN MAKE  
THE MOUNTAINS  
CRUMBLE.
