

Year 1 Home Learning

Topic & science

This half term, our topic is *Our World*. We will be looking at our local area, and learning about the city, country and continent we live in. We will also be learning about how we can look after our world.

Our Science topic is *Seasonal Change*. We will be finding out about how the weather changes across the four seasons and which weather is most closely associated with different seasons.

Proper Project

Seasonal Change

As the seasons change from winter to spring, look closely at what you can see around you. What changes do you notice? Are there any patterns you can spot? Does it get dark at a different time each day?

Keep a weather diary. You could record the amount of rain, the temperature, the time of sunrise/sunset and even the number of flowering plants.

Add any useful diagrams to your diary or perhaps photograph some of the changes you see, and bring it in to share with the class.

Create 'n Make

Can you make a leaflet/
booklet/picture about our
local area?

You might want to draw a
picture of your favourite
restaurant, coffee shop or
park. You could write why
you like going
there. You could
even go out and
take a
photograph of it.

Let's talk...

In the topic 'Our World', we will be talking about our environment and how we can help look after it. Can you think of small ways that you can help at home? Discuss the different ways that you could help look after our environment with someone at home.

Out and about...

Did you know that the Government has said that children should be physically active for at least 60 minutes each day? This helps you to stay fit and healthy. Doing physical activities should also be fun!

Why not complete a physical activity diary for one week during this half term? Activities could include going for a walk, cycling, taking part in a playground activity or a sport of your choice.

Once you've completed your log, you could bring it to school to share with your class.
