Nursery - learning at home

The most important thing is to allow your child plenty of time to play. Please continue to read lots of stories together. It's also important to allow your child to be as independent as possible during this time; encourage them to dress themselves, cut up their own food etc.

Here are some ideas of activities for your children to do at home.

Junk Modelling

Save your old boxes, toilet roll tubes, bottle tops to let your children create and build fantastic structures. Let your child have as much creative freedom as possible. You could make suggestions such as adding bottle tops for wheels, toilet tubes for arms of a robot, but your child will have lots of their own ideas on what they would like to make and how they would like to make it. It is important to model how to use scissors safely, how to fix things together. Take a photo of your creations or save them to show to everyone. They could have a go at labelling their models. Another idea is to ask children to plan/draw their ideas out first and make a list of the resources they will need to make it.

Playdough

If you would like to make a simple playdough recipe, you could get your child to help you. Playdough can be used in so many ways, and is beneficial for imaginary, sensory, mathematical play. With the playdough you could provide candles, sticks, buttons or anything that could be used as candles on a cake, decorations etc. You can also provide plates, muffin trays where opportunities for counting are present. If you have paper, ask your child to write menus, take orders, and make birthday invites and cards.

Playdough Recipe:

2 cups of flour, half a cup of salt (optional), 1tbs oil, 1 cup of water and a squirt of your child's paint or food colouring (optional).

Mix the flour and salt together and add the oil. Mix the paint/colour with the water and add slowly. Mix together and knead until you have a dough-like consistency.

Water play

Children love playing with water in their imaginary play. You don't need a water tray, water play can take place in the bath, in a bowl on the table/floor, the sink. You can provide shampoo, soap bottles, funnels, measuring jugs, or other containers you may have in your kitchen. Children also like to use toys in the water too. You could suggest making potions with your child and again have a notepad nearby to encourage children to make labels and recipes for their potions.

Drawing/Mark Making

Whatever activity your child is doing it's always useful to have paper and pens/crayons nearby. For example, a child playing with their cars and trains may be encouraged to make stop signs, traffic lights. A child playing with dolls might be encouraged to write invitations to the baby's birthday party. If you don't have access to pens and paper please contact school and we will try and help.

Cooking

Most children really enjoy helping to bake or cook and these activities provide so many learning opportunities: reading recipes together; making a list of ingredients and equipment; understanding and following instructions; weighing and measuring ingredients; chopping, mixing, pouring etc. Simple recipes are best so that your child can take the lead (with supervision).

Puzzles and games

It's great for you and your child to play a game or build a puzzle together to understand the rules, and the concept of turn taking.

Topics

In Nursery we have covered a lot of topics so far. You may want to look in more depth of some of the things we have been learning about. Here are some of the topics so far.

Volcanoes

Space

Different countries/looking at world maps.

Weather

Winter/Antarctica
