

# Year 1 Home Learning

## Topic & science

This half term, our topic is 'Flowers and Insects'. We will be looking at the parts of an insect, (e.g. abdomen, thorax, wings etc.) and learning about how to identify an insect.

Our science topic is *Plants* for the whole of the summer term. We will be finding out about common wild and garden plants, and we will also be learning about the structure of some of these plants and flowers.

## Proper Project Insects

Think of an insect. Find out three interesting facts about your insect. Think about how many legs it has, if it has wings, what colour it is, etc.

Now write three clues using your interesting facts. Bring these clues to school and see if your friends can guess your insect!

## Create 'n Make

### Secret Garden

Create your own secret garden full of your favourite flowers and insects.

Find a shoebox and build your own garden paradise inside. You could use photos, magazines, make your own pictures or even press your own flowers!

## Let's talk...

It is nearly the end of the year. Think about your time in Year 1; what have you most enjoyed? Are there any things which you found difficult at first, but that you can now do easily? What are you looking forward to in Year 2? Do you have any questions for your Year 2 teacher?

## Out and about...

Flowers and Insect hunt!

What flowers and insects can you name? Go for a walk in a park and see how many you can spot!
