

# Year 2 Home Learning

## History & Geography

This half term we have different topics for history and geography.

Our **geography** topic is *Holidays*. We will find out which continent different countries are in. We will compare the weather and other features of different countries.

Our **history** topic is *The Stone Age*.

## Proper Project

Design a hotel!

Choose a geographical location or holiday destination and design a new and unusual hotel.

You could look at some existing hotels for inspiration: An ice hotel, treetop hotels, Giraffe Manor.

Think about the weather there, what people might like to do there, and how you want the hotel to look. Also consider a theme, what will the staff wear? What will the rooms look like?

## Let's talk...

Many people travel far and wide for their holidays. This has led to an increase in air travel which is bad for the environment.

Do you think we should limit travel in cars, planes and trains? What might happen if we did?

## Geography

Use an atlas to help you draw a picture of the United Kingdom. Label England, Scotland, Wales and Northern Ireland. Then label the capital of each of these 4 countries.

## History

Invent an outfit for a cavewoman or caveman to wear. You could draw, paint or use collage. Think carefully about what materials would be available during the Stone Age.

## Create 'n Make

Research what tools were used in the Stone Age and then make your own.

Think carefully about what materials would be available to someone who lived then.

Think about what your tool would be used for.
