

Year 1 Home Learning

Topic & science

This half term, our topic is *Stories from the past*. We will be looking at stories from the Stone Age and about the Vikings.

Our science topics are *Animals including humans* and *Seasonal Change*. For this home learning we want you to focus on *seasonal change*.

Proper Project

With an adult, look on the internet at some Stone Age homes.

Have a go at drawing your own Stone Age home and label it. You could draw some people outside the home. Think about what they might be wearing and what they might be doing.

You could use sticks and fabric and have a go at making it.

Create 'n Make

Design a kite. Think about what shape it is going to be and what patterns you want on it. Is your kite going to have a tail? Have a go at making it. Make your kite. Think carefully about what paper would be best to use.

Choose a windy day and go and fly your kite. You could take a picture of yourself flying your kite and email it to your teacher at admin@coleridgeprimary.net.

Let's talk...

Think about life in the Stone age where there wasn't any electricity so children wouldn't have been able to watch TV or play on tablets. Imagine you lived in the Stone age. What would you like about it and what would you miss?

Out and about...

Look at the weather forecast in the morning. When you go out during the day, see if the forecast was correct. Can you make your own chart to show what the weather was actually like?
