

Reception Home Learning

Our focus texts for this half term will be: **Grendel** by David Lucas and **What the Ladybird Heard** by Julia Donaldson. We will also be visiting Freightliners Farm for our school trip.

Create 'n Make

Talk to people at home, look on the internet, and in books, to find out about things we can do to help keep our local environment clean and tidy.

Can you collect some different things we can recycle and use them to make something? You could make a collage picture, a model, or even a poster about helping our world.

Growing

Spring is a great time of year to grow things. You could have a go at growing a plant or vegetable yourself. Do you know what plants need to grow? How will you look after your plant? When it starts to grow, you could measure it, take photos of it, or draw and label pictures of how it looks. (If you need any seeds or resources, please ask your teacher).

Physical Development

Now that the weather is getting better, people like to spend more time outdoors in parks and in other outdoor spaces. Is there a park or outdoor space near you? Maybe you could use what you have learnt in PE at school to have a go at practising a new skill such as kicking/throwing a ball or a team sport? You could also challenge yourself to have a go at climbing some equipment you never have before or finding new ways to move across play equipment. Another idea would be to time yourself doing an activity such as climbing, running or skipping and see if you can do it faster each time!
