

Year 3 Home Learning

This summer half term, our topics are:

History: Alexander the Great

Geography: Climate and Biomes

Science: Bees

Topics
&
Science

Proper Project

Research **Alexander the Great**, or one of the other important leaders or thinkers from that era (e.g. Ptolemy the astronomer, Euclid the mathematician) – use websites or books to find out as much information as you can about them.

Present your findings in any way you like; you could make a poster, an information leaflet, a power point presentation or a fact sheet.

Websites to visit

Science: [Honey bees](#)

Geography: [Biomes](#)

History: <https://www.bbc.co.uk/bitesize/topics/z87tn39/articles/z8q8wmn> - General website about Ancient Greece, and Alexander the Great.

Create 'n Make

Make your own model of a bee!

We will be drawing and labelling the parts of a bee in class this term. Have a go at making your own model bee. Make sure you include (and can name)

as many parts of the bee as you can.

You can decide how to make your bee, but you could use: card, cardboard tube, tissue paper, felt tips, pipe cleaners, google eyes or buttons.

Out and about...

Lots of London museums have climate-related exhibits or programmes that could be exciting, either to visit in person or explore online. For example *Our Future Planet* (Science Museum); *Climate Crossroads* (London Transport Museum); the *Natural History Museum*; the *Horniman Museum*; *Kew Gardens*.
