

Year 1 Home Learning

Topic & science

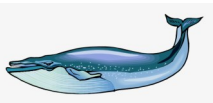

This half term, we will be continuing our science topic of plants as well as looking at seasonal change. We will be growing our own plants at school, looking closely at their structure and what they need to survive.

Our geography topic this half term is oceans and seas. We will be learning about the main 5 oceans and the wildlife within them.

Proper Project sealife

Think of a sea creature. Find out three interesting facts about your creature. Think about where it lives, what it eats, what colour it is, how it moves etc.

Now write three clues using your interesting facts. Bring these clues to school and see if your friends can guess your sea creature!

Let's talk...

It is nearly the end of the year. Think about your time in Year 1: what have you most enjoyed? Are there any things which you found difficult at first, but that you can now do easily? What are you looking forward to in Year 2? Do you have any questions for your Year 2 teacher?

Create 'n Make

plant dance

Create a dance inspired by the plant cycle. Start as a bean, and imagine yourself growing roots, a stem, leaves and even flowers.

What actions can you use to represent the twisted roots? What actions can you use to represent the strong, stable stem?

You might even want to do the dance to some music! Once you've learnt the dance, perform it to an audience, maybe family or even the class.

Out and about...

Flowers and Insect hunt!

What flowers and insects can you name? Go for a walk in a park and see how many you can spot!
